RIZKI FIRDAUS PURNAMA

COMPUTER SCIENCE STUDENT

Bandung | 081774181548 | kikifirdaus2408@gmail.com | github.com/RizkiFirdausPurnama | linkedin.com/in/rizki-firdaus-purnama

Computer Science student at Binus University focusing on Full-Stack and Web Development. Passionate about building robust, scalable, and functional web applications. Experienced in handling end-to-end development lifecycles, combining strong technical logic across both frontend interfaces and backend architectures to deliver efficient software solutions.

SKILL

- Soft Skills: Problem Solving, Decision Making, Teamwork, Collaboration, Adaptability
- Tools and Skills: C/C++, Python, HTML, CSS, Bootstrap, JavaScript, React.js, Next.js, PHP,Laravel MySQL,Supabase,PostgreSQL, Figma, GIT.

WORK EXPERIENCE

Internship at Otto Pharmaceutical Industries - Full Stack Developer **February 2026 - Present**

- Acted as the sole developer for two key internal web applications, independently handling the entire software development lifecycle without team support.
- Successfully migrated an existing legacy system from the Yii framework to Laravel 5.4, while simultaneously developing and integrating new custom features based on direct user requests.
- Engineered a custom Digital Signature application from scratch, taking full responsibility for the database architecture, backend logic, and frontend interface.

ORGANIZATIONAL EXPERIENCE

Himpunan Mahasiswa Teknik Informatika - Creative and Design Division **April 2025 - March 2026**

- Collaborated with BNEC x HIMTI to design official event merchandise (tumbler) for the "From Campus To Career: A Journey into the IT World" seminar.
- Designed and executed key visual assets for the SESVENT 2025 event, including the official social media twibbon and event certificates.

EDUCATION

SMA Negeri 1 Tasikmalaya **2019 - 2022**

- Administrator of MICRO (Measter IT Center Real Organization): reactivate an organization that has been inactive for 2 years, Gathering members of 40+ people

Bina Nusantara University **September 2023 - Present**

- Active member of Himpunan Mahasiswa Teknik Informatika
- Currently pursuing core subjects in computer science including programming,IoT, AI and algorithms

PROJECTS

DigiSing **2026**

- Engineered a web-based Digital Signature application from scratch using Laravel 5.4, enabling users to upload, preview, and digitally sign PDF documents via an intuitive drag-and-drop interface.
- Developed advanced document workflows supporting multi-signer processes (serial and parallel), real-time signature pad generation, and secure guest signing without account registration.
- Implemented an interactive PDF viewer using PDF.js, automated email notifications for signing queues, and comprehensive audit logs to track document history securely.
- Tech Stack: Laravel 5.4, PHP 5.6, MySQL, PDF.js, HTML, CSS, JavaScript.

Kasir Pintar **2025 - Present**

- Engineered a comprehensive Point of Sales (POS) system using Next.js 14 (App Router) and Supabase, designed to streamline retail operations and inventory management.
- Implemented real-time financial analytics using Recharts, visualizing key metrics such as Net Profit (Revenue vs. COGS), Daily Revenue, and Asset Valuation to aid business decision-making.
- Developed a robust inventory system with automated "Low Stock" algorithms and a versatile cashier interface supporting multi-method payments (Cash, Transfer, & Credit/Kasbon).
- Tech Stack: Next.js 14, Supabase (PostgreSQL & Realtime), Tailwind CSS, Recharts.

SHOP.CO **2025**

- Engineered a dynamic Single Page Application (SPA) using React.js and Tailwind CSS, featuring secure user authentication (Login/Register) and responsive UI.
- Developed a robust RESTful API using Laravel 11 and MySQL to manage product data, shopping cart functionality, and order processing transactions.
- Deployed the fully functional application with a split-hosting strategy: Frontend on Vercel and Backend/Database on Railway.
- Tech Stack: React.js, Laravel 11, MySQL, Tailwind CSS, REST API.

DocTime **2024**

- Designing wireframes and high-fidelity prototypes in Figma for user registration flows (Login, Register) and Landing Pages.
- Implementing designs (UI/UX) into functional and responsive web pages using HTML, CSS, & JavaScript.
- Tech Stack: Figma, HTML, CSS, JavaScript.

Nyusur **2024**

- Designed high-fidelity UI mockups and developed the front-end implementation (HTML/CSS) for the core user reporting flow.
- Collaborated in a 5-person team to build the application, integrating the front-end with the database.
- Utilized Firebase as a real-time database to store user-submitted reports and photos of road damage.
- Tech Stack: HTML, CSS, JavaScript, Firebase

LANGUAGE

- **English**: Advanced
- **Indonesian**: Native Speaker
